Material Specifications for M.A. Sump Pans

Plastic

M.A. Sump Pans and lids are made of a 20% glass filled copolymer polypropylene. The glass filled copolymer polypropylene used in all M.A. Sump Pans and Lids conforms to ASTM D4101 PP0320G20A23330.

Load

Sump Pans are primarily used in Utility Vaults, Communication Boxes, and Manholes. The maximum load requirement would not exceed 300 lbs. in the above applications. The ultimate load on the M.A. Sump Pan would exceed 1100 lbs.
